

I am writing to request that the FCC reject NAB's petition 04-160. I love XM radio! XM radio offers a variety of music choices that you just can't get on the local radio stations. When I get in the car in the morning, I just want to hear the traffic and weather, then switch to music for the rest of my drive. On local radio, you have to hope you catch the reports at the right time. You have to listen to a bunch of commercials in between the reports. I hate commercials, and local radio plays almost as many commercials as songs. I would be furious if you limited XM radio in any capacity simply to protect the inferior product of local radio. Capitalism is all about the better product thriving, and XM is the better product.
